

Gas-off Application for Living and Work Space - 20g

(This 20 gram application is used for minor to moderate odor issues in spaces 500 square feet or less. For larger spaces, or more severe odor intensity, we recommend using our 100-gram application)

Areas to be treated must be entirely unoccupied during the application (this includes pets)

1. PuroClenz works best in dark environments, so it is important to either treat at night or simply close your blinds, drapes, etc.
2. Make sure all doors and windows are closed during treatment
3. Fill the designated PuroClenz cup to the 20 gram red fill line with room temperature water
4. Place the cup in a central location in the area being treated
5. Tear open the foil pack, place the PuroClenz tablet into the cup of water, and exit the area
6. Allow PuroClenz to generate vapor for an hour for minor odor issues, up to overnight for more intense odor issues
7. **IMPORTANT:** avoid breathing in the vapors when returning to the area. PuroClenz will still be partially active at this point.
8. Upon return, open all windows and doors in order to allow any remaining PuroClenz to dissipate outside. You can dispose of the remaining product in the cup in any drain or toilet. Drawing fresh air into the treated area using a fan will accelerate the airing out process
9. Your PuroClenz process is now complete
